The homeowners wanted to relocate the cluttered fixtures, opening more space for functional movement. Their

goal was to have a more relaxing and spectacular bathroom.

Incorporating a new, larger tub and private shower space with a clear surround

into the room offers a spa-like feel. Instead of hiding the fixtures down a dark hallway, Creative Design opened the space and designed a complimentary area without having to expand the footprint of the room. The elliptical ceiling detail was recessed into the existing storage space on the finished third floor.

The result, according to the customers, "We feel like we are in a luxurious European hotel!"
